

# ABex AM-306 Relay

ABex relay module with 88 SPST relays and three 4x1 multiplexers

## Overview

The ABex AM-306 is a performance relay card for signal interconnection up to 110V / 2A. The relay board has 100 channels divided into 88 single channels and 3 blocks with 4 channels each which are switched to a common root (multiplexer).

The ABex AM-306 is designed as a pin compatible replacement for the ABex AM-302 as well as the ABex AM-303.

## Features

- 100 channels (88 single + 3x 4/1 multiplexed)
- max 110V
- max 2A (50W)
- Long lifetime due to reed relays
- Simplified maintenance due to through hole relay modules
- Standard 192 pin ABex front connector
- Integrated in Konrad Switching and NI TestStand
