

Your trusted companion in NI TestStand

Nigel is the first AI built for test. It can generate sequences and contextual programming advice from within the TestStand environment, accelerating your learning and development—so you can be even more productive.

Why Nigel AI

Unlike general-purpose AI tools, Nigel is built for test and measurement, equipped with our extensive domain expertise and integrated into our platform to deliver smarter, more relevant answers.

Test Expertise

Nigel has been taught test system design, methodologies, and data analysis so you can get instant information on best practices, measurement setup, and more.

Productivity Acceleration

Nigel AI is integrated into TestStand to help you build test systems faster. Development is better Nigel and TestStand as it has the context of your system and expert test knowledge to develop and debug more efficiently.

Rapid Increase in Capabilities

The rate of change in AI for both adoption and capability are unprecedented. Nigel is built on leading technology, and it is continuously improving, growing as an advisor, an author, and agent soon, too.

Nigel Delivers More Value to Test Engineers

How Nigel Can Help You

Learn TestStand Faster

Nigel can answer your questions about TestStand and your sequence. No more scouring the internet for unreliable answers—Nigel will explain concepts, functions, and errors related to TestStand, so you can make the right decisions faster.

Develop Faster

Nigel can generate sequences based off a given set of requirements to significantly accelerate development. And Nigel can show you where to find key settings so that you can modify your sequence without digging through menus so you become a better developer.

Review Sequences Faster

Inheriting projects from colleagues and understanding changes made during development can be difficult and time-consuming. Nigel can provide an overview of the sequence and explain the functionality in detail so you can onboard to the project more quickly.

Frequently Asked Questions

Q: Is Nigel secure?

A: Yes, Nigel is built on Emerson's secure and robust cloud operations platform. It uses best-in-class OpenAI models, hosted on Microsoft Azure with enterprise-grade privacy and security guarantees.

Q: Does Nigel store my data?

A: No, Nigel only stores your prompt data locally. Emerson does not have access to your conversations with Nigel unless you explicitly share that information with us.
