

Press release

dataTec authorised as the only NI training partner for Germany

NI appoints dataTec as Authorised Training Partner / Experienced engineers impart first-hand knowledge

Reutlingen, **XX**. March 2024 - National Instruments has appointed dataTec AG as an "Authorised Training Partner" for the German market in order to expand its range of training courses and give an even wider circle of people access to NI-specific knowledge. dataTec has been a partner of National Instruments since 2021 and has its hardware and software products in its portfolio. "The certification as an NI training provider is another logical step in the long-standing, trusting cooperation between our two companies," says Markus Kohler, CEO of dataTec AG. This statement is emphasised by Emil Thomas, Education Services Sr. Manager, Global Training Delivery at NI: "dataTec is an important partner with a great deal of expertise and experience in our products and solutions. We therefore rely on dataTec as an NI Authorised Training Partner to provide training for our customers in the German market."

A team of experienced experts specially trained for NI seminars are now offering exclusive face-to-face training courses in Reutlingen and Munich. The programme includes seminars for both beginners and professionals on the NI portfolio LabVIEW, TestStand and DIAdem. Participants can acquire specific certifications for the LabVIEW system development software training courses: the "Certified LabVIEW Associate Developer" (CLAD) for basic knowledge, the "Certified LabVIEW Developer (CLD)" for advanced knowledge and the "Certified LabVIEW Architect" (CLA) for in-depth knowledge. "All of our trainers are engineers, users or developers with many years of experience and special training in NI products, who pass on their first-hand knowledge," explains Roland Bertler, Head of the dataTec Academy. "We are delighted to be able to expand our academy's programme even further with the NI certification." The two companies work hand in hand to organise the seminars: The dataTec Academy is the
