

Press Release.

dataTec Schweiz and FLIR Systems exhibit high-end measuring devices at maintenance Schweiz

High-precision thermal imaging and leak detection at 10x speed / Bundled consulting expertise through close cooperation with manufacturers

Reutlingen, 17 October 2023 - dataTec Schweiz AG will be exhibiting for the first time at *maintenance Schweiz* in Zurich from 25 to 26 October 2023 and, together with the leading manufacturer of thermal imaging cameras FLIR, will be presenting some of the most modern and powerful products in test and measurement technology. The exhibition highlights include the powerful FLIR T865 thermal imaging camera and the FLIR Si124-LD high-speed acoustic imager. The T865 portable infra-red camera is a non-contact inspection tool with a 180 degree rotatable optical block, precise temperature measurement and laser-assisted autofocus, which can be used to reliably assess the condition of critical electrical and mechanical equipment in supply and production areas. The FLIR Si124-LD is a leak detection system that detects leaks in compressed air systems up to ten times faster than conventional methods. The lightweight hand-held camera has 124 microphones and generates a detailed acoustic image that is superimposed on a digital camera image in real time, enabling the sound to be localised precisely. Middle-range thermal cameras from FLIR, oscilloscopes, cable and antenna analysers from dataTec's cooperation partner R&S as well as portable data loggers, appliance testers, protective conductor testers and measurement accessories from other suppliers will also be exhibited.

“We are delighted to be exhibiting at *maintenance* for the first time and to be able to highlight a wide range of maintenance-related measurement solutions from various manufacturers,” says Franco Schmid, Managing Director of dataTec Schweiz AG. “The joint exhibition with FLIR emphasises our close relationship with manufacturers, which enables us to ensure seamless communication and information flows - an essential component of our expert advice.” says Cemil Cayli, Channel Sales Manager DACH at FLIR Systems GmbH, also emphasising the high value of the partnership with dataTec: “The joint trade fair appearance is a great opportunity to exhibit our combined expertise in Zurich. In the field of maintenance and repair, we have built up many joint customer relationships across all sectors. We see the trade fair as an opportunity to deepen these relationships and make new contacts.”

The *maintenance* is the leading Swiss specialist trade fair for industrial maintenance. This year, for the 15th time, it will highlight the latest trends and solutions covering all aspects of the industry – from inspections, maintenance management and equipment right through to smart maintenance, spare parts and services. Visit dataTec Schweiz from 25 to 26 October at stand F35 to discover innovative solutions for your maintenance requirements.

About dataTec

dataTec AG is Germany's leading specialist distributor for test and measurement technology. Since 2018, dataTec has been pursuing the European expansion of its sales activities and is currently active in Spain, Switzerland, Austria and in the Nordic countries of Sweden, Estonia and Finland. MESATEC, founded in 1991 and based in Hünenberg with a branch in Geneva, has been part of dataTec since August 2022; the company was renamed dataTec Schweiz AG in March 2023. The broad dataTec product portfolio of more than 50 manufacturers includes power supply units, oscilloscopes, modular measurement technology, test systems, test equipment and thermal imaging cameras.
