

# ABex TM-4070 DMM

ABex terminal module for NI 407x and 408x DMM cards

## Overview

The ABex TM-4070 is an ABex terminal module to interface with NI PXI-407x or PXIe-408x and gives the possibility to route the DMM signals to the front connector and the Analog bus. The routing to the analog bus is software controlled and the signals are switched with reed relays.

## Features

- Compatible with NI PXI-407x or PXIe-408x DMMs
- Feedthrough of DMM Signals to front connector
- Switching possibility of DMM Signals to analog bus
- Standard 192 pin ABex front connector
- Integrated in Konrad Switching and NI TestStand
