

Press Release.

dataTec Switzerland hosts the "Modular Measurement Technology Day"

Manufacturers and dealers provide expertise on the latest test and measurement technology / Space for networking and exchanges of experience on complex testing tasks

Reutlingen, 27 October 2023 - National Instruments (NI) and dataTec Schweiz AG invite you to the "Modular Measurement Technology Day" in Zurich on 7 November. For one day, test managers and test engineers have the opportunity to expand their knowledge, familiarise themselves with innovations in test and measurement technology and exchange ideas on complex measurement tasks. NI experts from three countries will share their experience and work with participants in the "Bring your own challenges" workshop to develop solutions for specific measurement requirements, which can be submitted to dataTec in advance of the event. The programme, which will last around eight hours, includes expert sessions and practical application examples and offers an opportunity for discussions, networking and getting to know the latest hardware and software solutions in a separate exhibition area. In addition to NI, dataTec partners Helbling Technik, PI Electronics and Sci-Consulting will also be attending the event.

The five English-language expert sessions will cover the following topics: NHR AC/DC sink/source power products, TestStand, test system development, wireless technologies and NI hardware. The Modular Measurement Technology Day starts at 8.30 a.m. and the venue is the Umwelt Arena in Spreitenbach near Zurich. Participation is free of charge, the number of places is limited.
