Portable 10-Channel Data Recorder
DAS220 Series

The DAS220 is a portable and rugged datalogger for performing measurements virtually anywhere. With 10 universal inputs and convenient screw terminals, the DAS220 makes it easy to measure common process parameters including voltage, current, temperature, pressure, and more. The DAS220 also provides 12 digital inputs, 4 timing inputs, and 4 alarm outputs for process monitoring applications.

Featuring a 10-inch touchscreen display and intuitive user interface with large icons, it is easy to configure channels and view measurement data. The convenient channel setup menu displays the settings for all 10 channels including measurement type and scaling. To view live data, select from numerical, time-series graph, or X-Y plot display setup modes.

The DAS220 is ideal for acquiring and storing data over extended periods of time. Data is saved in the internal memory and can be transferred to an external USB flash drive. When equipped with the optional internal battery, the DAS220 can log data for up to 15 hours without connecting to external power.

The DAS220 also provides ethernet connectivity and LabVIEW™ drivers for remote configuration, instrument control, and viewing data. Free PC operating software is also available for viewing acquired data and file conversions.
