

# ASR-3000 Series

Programmable AC/DC Power Source

## FEATURES

- Output Rating: AC 0 Vrms to 400 Vrms, DC 0 V to  $\pm 570$  V
- Output Frequency up to 999.9 Hz (5 kHz for ASR-3400HF only)
- DC Output (100 % of Rated Power)
- Measurement Items: Vrms, Vavg, Vpeak, Irms, IpkH, Iavg, Ipeak, P, S, Q, PF, CF
- Voltage and Current Harmonic Analysis(THDv, THD*i*)
- Remote Sensing Capability
- OCP, OPP, OTP, AC Fail Detection and Fan Fail Alarm
- Support Arbitrary Waveform Function
- Output Capacity: 2 kVA/3 kVA/4 kVA/5 kVA
- Customized Phase Angle for Output On/Off
- Sequence and Simulation Function(up to 10 sets)
- Interface(std): USB, LAN, RS-232, GPIB
- Built-in External Control I/O and External Signal Input
- Built-in Output Relay Control
- Memory Function (up to 10 sets)
- Built-in Web Server

Simply Reliable

The ASR-3000 Series is an AC+DC power source, featuring high-speed DC voltage rising and falling time ( $\leq 100 \mu\text{s}$ ). Five models of the series : ASR-3200(2 kVA), ASR-3300(3 kVA), ASR-3400/3400HF(4 kVA) and ASR-3500(5 kVA). The series can provide rated power output during AC output and DC output. Ten ASR-3000 Series output modes are available, including 1) AC power output mode (AC-INT Mode), 2) DC power output mode (DC-INT Mode), 3) AC/DC power output mode (AC+DC-INT Mode), 4) External AC signal source mode (AC-EXT Mode), 5) External AC/DC signal source mode (AC+DC-EXT Mode), 6) External AC signal superimposition mode (AC-ADD Mode), 7) External AC/DC signal superimposition mode (AC+DC-ADD Mode), 8) External AC signal synchronization mode (AC-SYNC Mode), 9) External AC/DC signal synchronization mode (AC+DC-SYNC Mode) 10) External DC voltage control of AC output mode(AC-VCA).

ASR-3000 Series is ideal for the development of On-board Chargers, Server Powers, LED modules, AC Motors, AC Fans, UPS and various electronic components, as well as for testing applications of automotive electrical equipment and home appliances.

The ASR-3000 Series provides users with waveform output capabilities including 1) Sequence mode generates waveform fallings, surges, sags, changes and other abnormal power line conditions; 2) Arbitrary waveform function allows users to store/upload user-defined waveforms; and 3) Simulate mode simulates power outage, voltage rise, voltage fall, and frequency variations. When the ASR-3000 Series power source outputs, it can also measure Vrms, Vavg, Vpeak, Irms, Iavg, Ipeak, IpkH, P, S, Q, PF, CF, 100th-order Voltage Harmonic and Current Harmonic. In addition, the remote sensing function ensures accurate voltage output, and the Customized Phase Angle for Output On/Off function can set the start and end angles of the voltage output according to the test requirements. The protection limits of V-Limit, Ipeak-Limit and F-Limit can be set according to user requirements. Over voltage limit, OCP, OPP will protect the DUT during the output process. The Fan Fail Alarm function and the AC fail alarm function are also designed in the ASR-3000 Series.

The front panel of the ASR-3000 Series provides a universal socket or a European socket, which allows users to plug and use so as to save wiring time. Since the power socket specification has a maximum current of 15 A, the rear panel of ASR-3000 Series is designed with a current circuit breaker. When the socket current is greater than 15 A, it will automatically open the circuit to protect users. The ASR-3000 Series supports I/O interface and is standardly equipped with USB, LAN, External I/O, RS-232C and GPIB.

## PANEL INTRODUCTION

## A. OPERATING AREA FOR ASR-3000 SERIES

AC Output for ASR-3200

DC Output for ASR-3200

AC Output for ASR-3300

DC Output for ASR-3300

AC Output for ASR-3400/3400HF

DC Output for ASR-3400/3400HF

AC Output for ASR-3500

DC Output for ASR-3500

| Model Name        | Power Rating | Max. Output Current | Max. Output Voltage      |
|-------------------|--------------|---------------------|--------------------------|
| <b>ASR-3200</b>   | 2 kVA        | 20 / 10 A           | 400 Vrms / $\pm 570$ Vdc |
| <b>ASR-3300</b>   | 3 kVA        | 30 / 15 A           | 400 Vrms / $\pm 570$ Vdc |
| <b>ASR-3400</b>   | 4 kVA        | 40 / 20 A           | 400 Vrms / $\pm 570$ Vdc |
| <b>ASR-3400HF</b> | 4 kVA        | 40 / 20 A           | 400 Vrms / $\pm 570$ Vdc |
| <b>ASR-3500</b>   | 5 kVA        | 50 / 25 A           | 400 Vrms / $\pm 570$ Vdc |

The ASR-3000 series is an AC + DC power source that provides not only rated power output for AC output, but also rated power output for DC output.

## C. SEQUENCE MODE AND BUILT-IN ISO-16750-2 WAVEFORMS

SEQ6: Momentary Drop in Supply Voltage

SEQ7: Reset Behavior at Voltage Drop with 12 V System

SEQ8: Starting Profile Waveform

SEQ9: Load Dump with Tr\_10 ms, Td\_40 ms

The sequence mode provides editable 10 sets of SEQ0~SEQ9, each set has 0 to 999 steps, each step time setting range is 0.0001 to 999.9999 seconds. Users can combine multiple sets of steps to generate the required waveforms, including waveform falling, surges, sags and other abnormal power line conditions to meet the needs of the test applications.

In addition, ASR-3000 Series also built in common ISO-16750-2 test waveforms in the Sequence Mode preset waveforms, including Momentary Drop in Supply Voltage built in at SEQ6, Reset Behavior at Voltage Drop with 12 V system built in at SEQ7, Starting Profile Waveform built in at SEQ8 and Load Dump with Tr\_10 ms, and Td\_40 ms built in at SEQ9.

## D. SIMULATE MODE

Simulate Mode can quickly simulate different transient waveforms, such as power outage, voltage rise, voltage fall, etc., for engineers to evaluate the impact of transient phenomena on the DUT. Ex: Capacitance durability test.

## E. FUNCTION WAVEFORM (ARBITRARY EDIT) MODE

ASR-3000 Series provides more than 20,000 waveform combinations in seven categories, allowing users to quickly simulate different AC voltage waveforms. Adjust the desired waveform type directly through the panel

(displayed synchronously on the screen), then the waveform is loaded into the ARB 1 to 16 waveform register through the access procedures, and return to the main menu output mode to perform ARB Waveform output.

## F. PC SOFTWARE

The ASR-3000 Series software includes basic settings, the Simulate Mode, the Sequence Mode, Data Log and the arbitrary waveform editing function. Users can directly set output voltage, frequency, start/stop phase on ASR-3000 Series through the software.

The Simulate Mode can quickly simulate different transient waveforms such as power outage, voltage rise, voltage fall... etc.

The Sequence Mode can edit the editing parameters read back from ASR-3000 Series, or directly edit the parameters and control ASR-3000 Series to output waveforms according to the set sequence. The arbitrary waveform editing function not only combines various waveforms, including sine waves, square waves, triangle waves, and noise waveforms, but also allows users to draw arbitrary waveforms and output them.

## G. T, IPK HOLD & IPK, HOLD FUNCTIONS

T, Ipk Hold is used to set the delay time after the output (1 ms to 60,000 ms) to capture the  $I_{peak}$  value and keep the maximum value. The update only functions when the measurement value is greater than the original value. The T, Ipk Hold delay time setting can be used to measure surge current at the power on process of the DUT. Ipk Hold can be used to measure the transient surge current of the DUT at power on without using an oscilloscope and a current probe.

## H. SLEW RATE MODE

The ASR-3000 Series can set the Slew Rate Mode to determine the rise time of the voltage according to the test requirements of the DUT. Slew Rate Mode provides "Time" and "Slope" modes. When setting "Time" mode, ASR-3000 Series can increase output to 10 to 90 % of the set voltage within 100  $\mu$ s; and when selecting "Slope" mode, ASR-3000 Series increases output voltage by a fixed rising slope of 1.5 V/ $\mu$ s until reaching the set voltage value.

In addition, if users decide to self-define the rise time of the output voltage, users can flexibly set the rise time of the ASR-3000 Series voltage by editing the Sequence mode.

| DIMENSIONS & WEIGHT   |                          |                             | 430 mm(W) x 176 mm(H) x 530 mm(D) (not including protrusions); Approx. 25 kg                       |   |   |   |   |  |

\* Note: A value with the accuracy is the guaranteed value of the specification. However, an accuracy noted as reference value shows the supplemental data for reference when the product is used, and is not under the guarantee. A value without the accuracy is the nominal value or representative value (shown as typ.).

Specifications subject to change without notice.  
ASR-3000CD3BH

### ORDERING INFORMATION

|                   |                                       |
|-------------------|---------------------------------------|
| <b>ASR-3200</b>   | 2 kVA Programmable AC/DC Power Source |
| <b>ASR-3300</b>   | 3 kVA Programmable AC/DC Power Source |
| <b>ASR-3400</b>   | 4 kVA Programmable AC/DC Power Source |
| <b>ASR-3400HF</b> | 4 kVA Programmable AC/DC Power Source |
| <b>ASR-3500</b>   | 5 kVA Programmable AC/DC Power Source |

### ACCESSORIES

Safety guide, Input terminal cover, Output terminal cover Include remote sensing, GRA-442-E Rack mount adapter(EIA), GTL-246 USB Cable

### OPTIONAL ACCESSORIES

|           |   |          |   |
|-----------|---|----------|---|
| GPW-005   | Power cord, 3 m, 105 °C, UL/CSA Type  | ASR-C003 | Modbus TCP feature  |
| GPW-006   | Power cord, H05VV-F 1.5 mm <sup>2</sup> /3 C, 3 m, 105 °C, VDE Type (ASR-3200, ASR-3300 Ues Only) | GTL-232  | RS232C Cable, approx. 2 m                                     |
| GPW-007   | Power cord, 3 m, 105 °C, PSE Type   | GTL-248  | GPIB Cable, approx. 2 m                                       |
| GPW-017   | Power cord H05VV-F 4.0 mm <sup>2</sup> /3 C 3 m, 105 °C, VDE Type                                 | ASR-002  | External three phase control unit for IP2W, IP3W, 3P4W output |
| GRA-442-J | Rack mount adapter(JIS)   | APS-008  | Air inlet filter  |
| GTL-137   | Output power wire<br>(Load wire_10AWG: 50 A, 600 V/Sense wire_16 AWG: 20 A, 600 V)                | GET-006  | Universal extension   |

\* European output outlet (factory installed)

### GRA-442-E

Rack Mount Adapter(EIA)

### GRA-442-J

Rack Mount Adapter(JIS)

### ASR-002

External three phase control unit

\* Basis Requirement of ASR-002 to ASR-Series

1. Must be the three same models of ASR-Series

\* Functions of ASR-Series are limited when conducts to ASR-002

1. No DC Output

2. Measurement Items: only current(A), power(W) and PF for each phase

3. No Voltage and Current Harmonic Analysis

4. No Remote Sensing Capability

5. No Arbitrary Waveform Function

6. No Sequence and Simulation Function

7. Not supported External Control I/O

8. No memory Function

9. Only support USB, no LAN port for communication
