# NI SystemLink

The Operating System for the Modern Lab

## The Benefits of SystemLink

SystemLink is a trusted, centralized platform for engineering and test teams of all sizes to plan, manage, and optimize tests.

- **Collaborate effortlessly** across teams and locations with shared access to systems and data.
- **Reduce retesting and downtime** by ensuring systems are always correctly configured and up to date.
- **Troubleshoot faster** with real-time visibility into system health and test execution—before they impact quality or schedules.
- **Gain confidence in your results** with built-in calibration tracking and secure file sharing.
- **Focus on testing**, not admin or generating reports—view everything from one dashboard.
- **Scale with confidence** from a small lab to a global enterprise, SystemLink scales with you.

“Using SystemLink and NI Package pre/post actions to achieve graceful shutdown, install, and restart process, we were able to reduce deployment time from 30 minutes per system to **3 minutes for an entire production line**”

Sub Zero

**90%**

**Decrease in  
per-system  
deployment time**

# What can you do with SystemLink?

## 1. Remotely Manage Test Systems

Monitor and control PXI, CompactRIO, and Windows PCs from anywhere. Maximize uptime and ensure system health across distributed labs.

## 2. Deploy Software with Confidence

Push updates, drivers, and configurations to multiple systems—centrally and consistently. Save time and reduce deployment errors.

## 3. Track and Optimize Assets

Stay on top of usage, calibration, and location for NI and third-party instruments. Maintain compliance and improve asset utilization.

## 4. Gain Real-Time Test Insights

Monitor TestStand executions live. Instantly see test performance and outcomes—no need to be on-site.

## 5. Centralize Test Data

Store and analyze TDMS files in one place. Ensure traceability and streamline data access across teams.

## 6. Visualize Information with No Code

Use built-in dashboards to view system status, test results, and KPIs—no programming required.

## 7. See Live Measurement Data Instantly

Stream live signals from FlexLogger and auto-upload waveforms for immediate analysis.

## 8. Control User Access with Ease

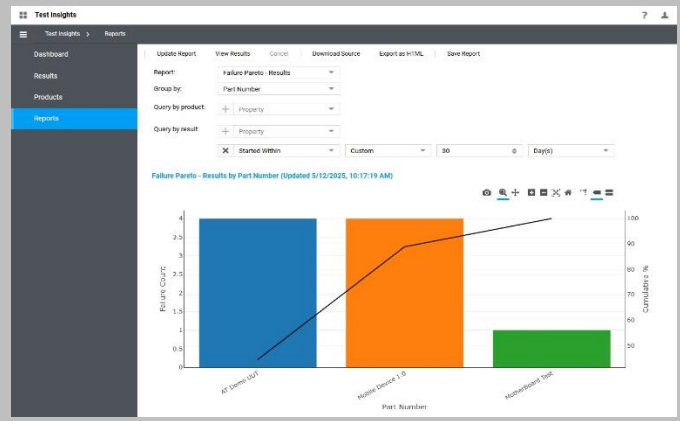

Manage user roles and data permissions securely with built-in access controls, including integration with your organization single sign-on.

## 9. Meet IT Standards with Simple, Secure Deployment

Deploy SystemLink in the cloud or on-premises quickly and securely. No external services required. Fast and secure setup that fits your IT policies.

## 10. Integrate Seamlessly with your Tools

Seamlessly connect with LabVIEW, TestStand, and FlexLogger. Leverage Jupyter Notebooks and Python for further customization.

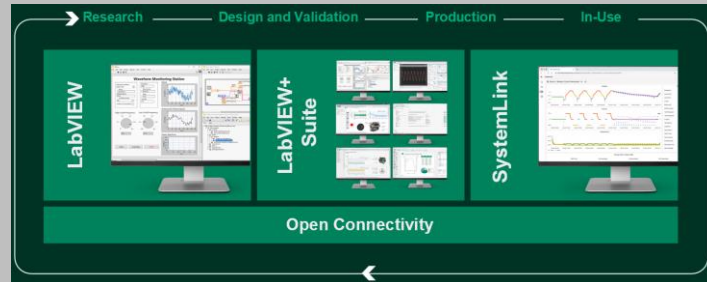

## Select your SystemLink Edition

Recommended for small labs and teams, manage your lab within minutes.

	Small	Medium
Connected systems	2-10	11-25
Users	5	10
Online training entitlements	3	7
Part number	790508-35	790509-35

## NI Software Platform

The most productive ecosystem for test and measurement professionals.
