

Press release

dataTec Schweiz AG is expanding its portfolio by four manufacturers

dataTec Schweiz AG continues to grow / Four new manufacturers in the program for even more brand-independent consulting

Hünenberg, April 30, 2024—dataTec Schweiz AG now offers even more test and measurement technology from a single source. Four well-known manufacturers have just been added to dataTec Schweiz AG's portfolio: Gossen Metrawatt, Chauvin Arnoux, FLIR, and Softing. The product range now includes around 20,000 products from leading brands such as thermal imaging cameras, test equipment, power supply units, oscilloscopes, and modular measurement equipment. With these additions, dataTec Schweiz AG is further expanding its consulting expertise. "We are delighted that we can now offer our customers even more customized solutions for their individual measurement tasks," says Franco Schmid, Managing Director of dataTec Switzerland. "Whether already existing or new, all products in our range benefit from dataTec's many years of in-depth expertise. In combination with cross-manufacturer consulting, we create the best possible settings for measurement tasks."

With Softing, dataTec has gained a hardware and software specialist for the industry whose products and technologies make it a market leader, particularly for testing and analyzing communication networks. Chauvin Arnoux is known for manufacturing high-quality devices for electrical safety testing, electrical quantity measurement, power measurement, and energy and fault analysis. The test and measurement devices from Gossen Metrawatt, a company with more than 100 years of experience in the industry, stand for quality, reliability, safety, and innovation. As a renowned manufacturer of thermal imaging cameras and thermographic instruments, FLIR now enriches the portfolio of dataTec Schweiz AG.

Since 2022, dataTec Schweiz AG has been continuously optimizing the range of test and measurement devices from various brands and manufacturers in Switzerland. dataTec supports its customers in Switzerland with new products from its location in Hünenberg. They include industrial companies as well as tradespeople in the fields of installation, electrics, mechanical and plant engineering, and companies in the energy sector.

About dataTec

dataTec AG is Germany's largest specialist distributor of test and measurement technology. Since 2018, dataTec has been pursuing the European expansion of its sales activities and is currently active in Spain, Switzerland, Austria, and the Nordic countries of Sweden, Estonia, and Finland. Founded in 1991 and based in Hünenberg, MESATEC technische Produkte AG has been part of dataTec since August 2022. In March 2023, the company was renamed dataTec Schweiz AG. dataTec's broad product portfolio of over 50 manufacturers includes power supply units, oscilloscopes, modular measurement equipment, test systems, test equipment, and thermal imaging cameras.
